Comparatia corecta a pretului de cumparare

intre diferite oferte de control extern cu si fara TVA, trebuie facuta la valoarea totala de plata din factura, per raport, si nu la valoarea fara TVA.

SCOPUL PARTICIPARII

- Monitorizarea calitatii de catre un organism neutru a rezultatelor emise de laboratorul participant. Performanta analitica se stabileste prin compararea performantei laboratorului participant cu performantele altor laboratoare.
- Luarea eventualelor masuri corective pentru eliminarea in timp util a problemelor de calitate, atunci cand acestea sunt evidentiata in raport.
- Detinerea dovezilor obiective si neutre ale calitatii, opozabile in fata oricarei autoritati.

NOTIFICAREA LA MS SI CERTIFICARE ISO

Toate programele de control extern furnizate de Tody Laboratories sunt si notificate la MSP cu Adeverintele nr.12781/01.04.2011 si nr.23411/15.06.2011 si certificate ISO 9001, pe care le gasiti pe site-ul www.tody.ro.

ETAPELE PARTICIPARII

Laboratorul participant primeste spre testare probe "oarbe" -> rezultatele obtinute se transmit prin fax/email/site catre administratorul schemei, respectand data-limita a fiecarei participari -> rezultatele sunt supuse analizei statistice, obtinandu-se un rapoartele de evaluare, care sunt transmise laboratorului. Fiecare laborator participant primeste un cod si o parola unice, care se pot folosi pentru accesarea site-ului www.labquality.fi.

PROBELE DE CONTROL EXTERN

Se trimite in cursul lunii pentru care s-a optat participarea si sunt insotite de instructiuni si formulare de rezultate electronice specifice sunt reprezentate de materiale biologice, de origine umana; sunt "oarbe" si trebuie analizate precum probele pacientilor, utilizand metoda si reactivii cu care se lucreaza in mod obisnuit.

TRANSPORTUL PROBELOR

Se efectueaza prin curier rapid, coletele contin componente care le mentin stabile inclusiv la temperaturi extreme.

MANIPULAREA PROBELOR

Probele sunt non-reactive pentru HBsAg, HCV Ac si HIV Ac, se manipuleaza de personal calificat, luandu-se toate masurile de securitate pentru prevenirea unei ipotetice contaminari.

PASTRAREA PROBELOR PINA LA TESTARE

Probele se testeaza in prima zi dupa receptia acestora si rezultatele se trimit imediat. Daca testarea nu este posibila in prima zi dupa receptie, probele trebuie pastrate la 2-8°C. Dupa deschidere sau reconstituirea, probele trebuiesc lucrate imediat.

TEHNICA DE LUCRU A PROBELOR

Probele pot fi lichide sau liofilizate, sunt insotite de instructiuni de lucru electronice care trebuie respectate cu strictete, se testeaza conform prospectului de lucru al reactivilor pe care ii utilizati in laboratorul Dvs. Nu este obligatoriu sa testati toti parametrii care apar pe formularul de rezultate, ci numai acei parametri pentru care doriti evaluarea performantelor. Se recomanda efectuarea mai multor testari pentru fiecare parametru in parte si raportarea mediei obtinute.

TRANSPORT PROBE IN SEZONUL CALD

Probele se trimit in acelasi mod catre toti participantii si sunt testate aproximativ in acelasi timp. Faptul ca in timpul transportului probele vor sta uneori la temperaturi de +20°C sau chiar +30°C timp de cateva ore, pana la 24 ore, nu influenteaza nici stabilitatea acestora si nici rezultatul final. Nu comparati probele de control intern care trebuie sa-si mentina stabilitatea saptamani sau luni dupa deschidere, cu probele de control extern de calitate care se testeaza o singura data, imediat dupa primirea lor. Stabilitatea probelor de Control Extern de Calitate este mare si nu este afectata de posibilele temperaturi care se pot atinge in timpul sezonului cald. Mai mult decat atat, furnizorul testeaza frecvent stabilitatea probelor si de-a lungul anilor s-a constatat ca aceasta nu este modificata sub nicio forma, nici macar in timpul perioadelor calduroase. Deoarece probele din cadrul aceluiasi program se trimit catre toti participantii in aceleasi conditii si ele se testeaza in ziua primirii sau cel mult urmatoarea zi, rezultatele obtinute sunt, astfel, comparabile. Asadar, este imperios necesar sa respectati cu strictete instructiunile de lucru primite impreuna cu probele.

REZULTATE

Rezultatele obtinute in urma testarii probelor receptionate se transmit catre furnizor pina la data-limita stabilita pentru fiecare program. Modalitatea de transmitere a rezultatelor difera de la un program la altul si este specificata in instructiunile electronice primite impreuna cu proba. La completarea rezultatelor cantitative, se verifica cu foarte mare atentie unitatile de masura raportate, astfel incat sa nu se genereze erori. Formularele de rezultate se completeaza urmand instructiunile primite. Tody Laboratories asigura asistenta telefonica in ceea ce priveste completarea corecta a formularelor de rezultate.

RAPOARTE DE EVALUARE

Rezultatele transmise de laboratorul participant sunt supuse analizei statistice, obtinandu-se un raport de evaluare, ce arata performanta rezultatelor laboratorului in comparatie cu cea a altor laboratoare inscrite la acelasi program. Raportul de evaluare compara rezultatele obtinute de laboratorul participant cu laboratoarele care fac parte din acelasi grup de comparatie – OWN GROUP – (laboratoare care folosesc aceeasi metoda, reactivi de la acelasi producator, acelasi aparat) si cu toate laboratoarele participante – ALL GROUPS – (laboratoare care folosesc diferite metode, reactivi proveniti de la diferiti producatori, diferite aparate. Raportele de evaluare se prezinta sub forma de: **histograme si tabele de sinteza** (numerical summary) – pentru testele cantitative sau **tabele individuale** – pentru testele calitative. Rapoartele de evaluare se afiseaza pe site-ul furnizorului (www.labquality.fi), in maxim 2-3 saptamani de la data-limita de trimitere a rezultatelor fiecarui program. Majoritatea rapoartelor de evaluare se transmit catre laboratorul participant prin posta, impreuna cu documente necesare interpretarii rapoartelor primite. Rapoartele de evaluare nationala TEQAS se trimit in maxim 3 zile lucratoare de la data limita de trimitere a rezultatelor.

CALCULAREA SCORULUI Z

Scorul Z este calculat si inserat in ambele rapoarte, international si national, vor avea calculat si inserat scorul Z, fara nici un cost.
